

## Launch 2: Destination Uranus

A Tech-Center Exploration of Space & the Planets

Your mission is to find out some interesting facts about your destination planet! Click on the name of your planet to get started. Read through the web page that appears, and answer the following questions:

- Uranus is the \_\_\_\_\_ planet from the sun. It's almost \_\_\_\_\_ times farther away from the sun than Earth! Not surprisingly, it is very \_\_\_\_\_ on Uranus! (*brrrrr!*) You can think of Uranus as a frozen gas giant!
- How many Earths could you place across the face of the Uranus? \_\_\_\_\_
- It takes Uranus approximately \_\_\_\_\_ Earth years to go around the sun.
- Uranus spins tipped, kind of like a barrel rolling on its side. Some scientists think Uranus may have gotten this strange tilt from being hit by a very fast

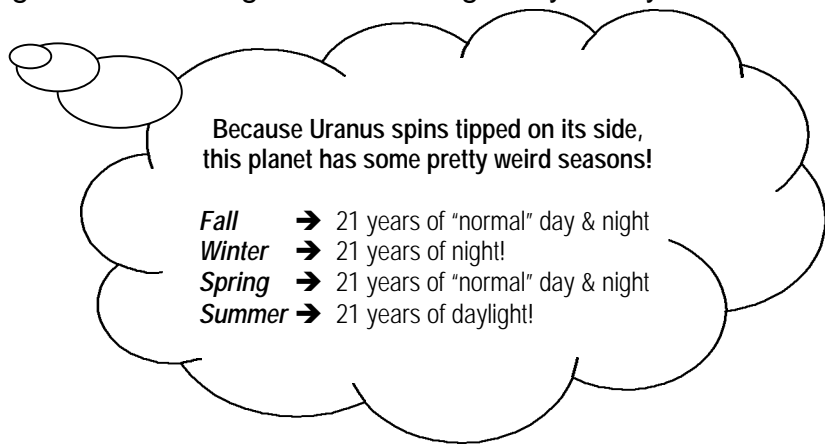

\_\_\_\_\_.

- What color is Uranus?

\_\_\_\_\_

- Who was Uranus?

\_\_\_\_\_

← How old would you be if you lived on Uranus?

Draw the symbol for Uranus in the box! →
