Home Visitation Training

What is HVT?

The Early Development Network has a 3 prong approach to delivering high quality Early Intervention Services: 1) The Routines Based Interview, 2) Functional IFSP Outcomes, 3) Routines-Based Home Visitation. This routines based home visitation training will give us the tools we need to have child and parent-focused intervention to help strengthen relationships between parents and professionals and to build parent competencies for enhancing parent-child interactions. It will give us the "curriculum of the home" to base EI services on.

The 411

- * All EI providers are required to attend
- * Bring a writing utensil
- * Lunch will be provided on the 10th
- * Come with an open mind
